

First Due Movers Helpful Tips

A few tips to help your move operate like a well-oiled Fire Engine!...

- **Box all items and ensure that box tops are sealed properly. “If it fits in a box, it belongs in a box”.**
- **Label all boxes with the correct room and/or destination (i.e. storage unit or living room).**
- **Empty out and clear all furniture of debris unless packing services have been arranged with a representative.**
- **Label any items that do not need to be moved or are moving to a separate location - your moving crew would be happy to assist with this on the day of your move.**
- **Separate any personal items that you do not want packed or moved (i.e. Keys, wallets, purses, medications, cable boxes, pet kennels).**
- **Remove personal vehicles from driveways to supply adequate space for our moving trucks.**
- **If parking is limited, try to reserve parking for our moving trucks. Tip: Use a personal vehicle to hold a parking spot until your moving crew arrives.**
- **Discuss any access issues at the pick-up/ drop-off location with your moving company (i.e. narrow, steep or sharply curved driveways, long walks, elevators, excessive stairs, etc.)**
- **Disconnect all electronics. If any equipment needs to be returned to their manufacturer, be sure to make prior arrangements (i.e. modems, cable boxes).**
- **Disconnect any water/ gas lines leading to appliances that are being moved. FDM is not permitted to disconnect or connect such supply lines.**
- **Be sure to separate paint, propane, gasoline and any other flammable or hazardous items as they cannot be included in the shipment. (This includes draining fuel from any gasoline-powered items).**
- **Remove linens and bedding from your mattresses.**
- **If you own a Sleep Number bed, keep the remote handy as it is required to inflate the mattress once moved.**

Thank you for choosing First Due Movers
